

## HOW CAN I PREPARE MYSELF?

The best way to prepare for a hurricane evacuation is to know your evacuation zone and develop a plan ahead of time.

## DETERMINE IF YOU LIVE IN AN EVACUATION ZONE

Use the Hurricane Evacuation Zone Finder at [www.NYC.gov/hurricanezones](http://www.NYC.gov/hurricanezones), call 311 (TTY: 212-504-4115), or consult the map provided in this brochure to find out if your address is located in an evacuation zone.

Areas of the city subject to storm surge flooding are divided into three zones based on how storms of different strengths will affect them. Residents in these zones may need to evacuate depending on the strength of the approaching storm.

### IF YOU LIVE IN AN EVACUATION ZONE

#### Prepare A Disaster Plan

Develop a plan with your household members that outlines what to do, how to find each other, and how to communicate if a hurricane strikes New York. If you rent your home, renter's insurance will insure the items inside your apartment. If you are a homeowner, make sure your home is properly insured – flood and wind damage are not covered in a basic homeowner's policy.

#### Know Where You Will Go

The City strongly recommends evacuees stay with friends or family who live outside evacuation zone boundaries. For those who have no other shelter, the City will open hurricane shelters throughout the five boroughs.

To ensure efficient use of resources, the City will ask all evacuees to report to an evacuation center. Once at the evacuation center, evacuees will either be assigned to a hurricane shelter in the same facility or transported to an associated hurricane shelter by bus.

To find the location of your evacuation center, use the Hurricane Evacuation Zone Finder at [www.NYC.gov/hurricanezones](http://www.NYC.gov/hurricanezones), call 311 (TTY: 212-504-4115), or consult the map provided in this brochure.

#### Keep a Go Bag Ready

Every household member should have a small Go Bag – a collection of items you may need during an evacuation packed in an easy-to-carry container such as a backpack. A Go Bag should be easily accessible if you have to leave your home in a hurry. (See Go Bag list on the right)

#### Assemble an Emergency Supply Kit

You may be instructed to shelter in place (stay at home) during a hurricane. Keep enough supplies in your home to survive for at least three days. (See Supply list on the right)

### IF YOU DO NOT LIVE IN AN EVACUATION ZONE

#### Assemble an Emergency Supply Kit

All areas of the city could face hurricane-related hazards such as high winds, flooding, tornadoes, and loss of utilities. You may be instructed to shelter in place (stay at home) for several days until the hurricane passes. (See Supply list on the right)

### IF YOU LIVE IN A HIGH-RISE APARTMENT BUILDING

Residents of high-rise apartment buildings may face special risks from hurricanes even if they live outside evacuation zone boundaries.

If you live in a high-rise building outside an evacuation zone, be prepared to take shelter on or below the 10th floor.

If you live in a high-rise building located in an evacuation zone, heed evacuation orders.

### A GO BAG SHOULD INCLUDE

- Copies of your important documents in a waterproof and portable container (insurance cards, photo IDs, proof of address, etc.)
- Extra set of car and house keys
- Copies of credit/ATM cards and \$50-\$100 cash in small denominations
- Bottled water and nonperishable food such as energy or granola bars
- Flashlight
- Battery-operated AM/FM radio and extra batteries
- Up-to-date medication information and other essential personal items. Keep a list of the medications each member of your household takes, why they take them, and their dosages. Also include all doctors' names and phone numbers
- First aid kit
- Contact and meeting place information for your household and a small regional map
- Child care supplies or other special care items

### AN EMERGENCY SUPPLY KIT SHOULD INCLUDE

- One gallon of drinking water per person per day
- Nonperishable, ready-to-eat canned foods and manual can opener
- First-aid kit
- Flashlight
- Battery-operated AM/FM radio and extra batteries
- Whistle
- Iodine tablets or one quart of unscented bleach (for disinfecting water ONLY if directed to do so by health officials) and eyedropper (for adding bleach to water)
- Personal hygiene items: soap, feminine hygiene products, toothbrush, toothpaste, etc.
- Phone that does not rely on electricity
- Child care supplies or other special care items

### BEFORE THE STORM

#### Stay Informed

For the latest information about an approaching storm or to find out if you should evacuate, stay tuned to TV and radio broadcasts, access [www.NYC.gov](http://www.NYC.gov), or call 311 (TTY: 212-504-4115).

#### Secure Your Home

If a tropical storm or hurricane watch is issued:

- Bring inside loose, lightweight objects, such as lawn furniture, garbage cans, garden tools, and toys.
- Anchor objects that will be unsafe to bring inside, like gas grills or propane tanks. Turn off propane tanks.
- Shutter windows securely and brace outside doors.
- Place valuables in waterproof containers or plastic bags.

#### Help Others Prepare

Check on friends, relatives, and neighbors, especially those with disabilities or special needs, and assist them with their preparation and evacuation.

If you live outside an evacuation zone, offer to shelter family and friends who may need to evacuate.

#### If Asked to Evacuate, Do So Immediately

The City will communicate specific instructions about which areas of the city should evacuate through local media.

#### If the City Issues an Evacuation Order for Your Area:

- Evacuate immediately. Use public transportation if possible.
- If you are going to an evacuation center, pack lightly, and bring:
  - Your Go Bag
  - Sleeping bag or bedding
  - Required medical supplies or equipment
- Let friends or relatives know where you are going.

### WHAT ABOUT MY PETS?

Make sure your disaster plan addresses what you will do with your pet if a hurricane requires you to leave your home. Plan to shelter your pet at a kennel or with friends or relatives outside the evacuation area.

Be sure you have supplies ready for your pet in the event of an evacuation, including food, a leash, a muzzle, proof of shots, and a cage or carrier.

### ACCOUNT FOR YOUR SPECIAL NEEDS

Consider your capabilities and make sure your preparedness plan addresses how your special needs affect your ability to evacuate.

- Determine if you will need assistance and arrange help from friends, family, or neighbors.
- Consider additional supplies and equipment that you may need to bring with you, such as medicine, icepacks, medical devices, and backup equipment. Bring food for your dietary needs.
- Include additional time and evaluate your transportation options.
